Dependency Management

Certifications

Python (Basic)

Katlego Barayi

Software Engineering intern @MTN CoE
Johannesburg, Gauteng, South Africa

Summary

I am currently a student at We Think Code, aspiring to become a proficient FullStack Developer. My journey began with mastering Python, focusing on Procedural Programming, which enabled me to complete several automation projects. Currently, I am deepening my expertise in Java, specifically in Object-Oriented Programming (OOP).

In addition to my backend development skills, I am also exploring FrontEnd Development and have gained experience in Mobile Development using Flutter. To stay versatile and well-rounded, I am actively learning Machine Learning and integrating it into my skill set.

My passion for technology drives me to continuously expand my knowledge and capabilities. I am dedicated to becoming a well-rounded FullStack Developer, capable of tackling diverse challenges and contributing to innovative projects.

_____

Experience

MTN
Software Engineer Intern
January 2025 - Present (1 year 1 month)
